Harrieta Christodoulou, DO

MSU HealthTeam welcomes our newest faculty member, Harrieta Christodoulou, DO. She earned her medical degree from Nova Southeastern University, College of Osteopathic Medicine and completed her Pediatrics residency at Charleston Area Medical Center. Her healthcare experience ranges from inner city to affluent neighborhoods, and includes a number of middle eastern ethnicities. Her diverse experience provides awareness of cultural norms and understanding of how to accommodate and create safe places for these cultures in pediatric care.

Most recently, Christodoulou worked as a Pediatric Hospitalist, gaining experience with inpatient and outpatient services, and producing a higher acuity of care. Christodoulou wants to keep kids fit and teach them how to maintain healthy lifestyles through the development of dietary/exercise programs and childhood obesity management.

Christodoulou joins our multi-specialty group as a board-certified Pediatrician. She is adding to our complement of 225 providers performing cutting-edge research, teaching medical and nursing students, and providing exceptional care to the Greater Lansing community.

Child Health Clinic
