Focused on physicians so you can focus on your patients
**ABOUT THE CONFERENCE**

The new Mid-Michigan Annual Endocrine Symposium was designed to provide local physicians and other health care professionals with 1.5 days of rich programming encompassing best practices and cutting-edge clinical advances in important thyroid and endocrine topics.

MAES merges the 36th Annual David Rovner Endocrine Symposium (ADRES) and the new John Crockett Annual Thyroid Symposium (JCATS). JCATS is the first thyroid symposium to be held in the Lansing area. It is named in recognition of late John Crockett, MD, a senior radiologist at MSU and the area’s expert on thyroid ultrasonography, who served as a mentor and teacher to the faculty of the MSU Endocrinology Division over the years. ADRES was established in 1975, by David Rovner, MD, founder of MSU's Endocrinology Division and was named in his honor in 2017.

At the end of this conference, attendees should be able to:

- Discuss the major advances in thyroid topics.
- Discuss the major advances in endocrine topics.
- Provide patient care based on current guidelines.

Planners, reviewers or faculty presenters have the following to disclose:

Mohammed Daoud, MD, has a relationship with Sanofi. Ved Gossain, MD, is a consultant/advisor with Abbvie. All conflicts have been resolved to ensure an unbiased presentation.

All other planners, reviewers, faculty presenters have nothing to disclose.
